

Main Features

- 2 x 7-pin SATA connector & 2 x SATA power reserved for 2 x swappable SSD bay, RAID 0 and 1 are supported

Product Overview

Expand the capabilities of your NDiS B562 with our optional extension module. The DockInfinity-2S is designed for users who require additional functionality, such as storage expansion, RAID-based data protection, and field-replaceable storage. Featuring dual hot-swappable 2.5" SSD bays, the module supports RAID 0 and RAID 1 configurations for either enhanced performance or data redundancy, making it ideal for edge computing, video recording, industrial automation, and mission-critical applications.

Specifications

Environment

- Operating temperature: -20°C~60°C
- Storage temperature: -20°C~80°C
- Humidity: 10%~95% (Non-condensing)

Mechanical

- Dimensions: 139.01mm (W) x 190.60mm (D) x 68.80mm (H)
- Weight: 1.05kg

Package Information

- Dimensions: 361mm (W) x 294mm (D) x 230mm (H)
- Gross weight (2 units per carton): 2.81kg

Ordering Information

- **DockInfinity-2S (P/N: 10W00DOCK03X0)**
Dual SSD bay kit for Duro Edge computer
