

## Product Overview

Mobile Healthcare kiosk is highly integrated with multiple physiological measurement equipment and a management tablet which collects personal physiological data from each device and then uploads data to cloud or hospital information systems.

### Get Physical Data

- PAD management software
- Get physical data from Bluetooth or USB
- Temporary Record data (20 record)
- Synchronize data to Cloud server
- Blood pressure, Temperature, Pulse
- Blood Oxygen rate, Weight, ECG

### Synchronize Physical Data to Cloud

- Synchronize with PAD data
- Record each personal data
- Analysis physical data
- History and diagram

### Management

- Send alarm when value abnormal
- Send an inform to mobile
- Describe line diagram

### Smart PAD with Management Software

- CPL Touch panel
- 802.11 b/g/n Wi-Fi
- Bluetooth
- 4G LET for optional

### Physical Measure Equipment

- Blood pressure meter (BT) or USB
- Ear thermometer (BT)
- Blood Oxygen (BT)
- Portable ECG (BT)
- Weight (BT, Optional)

### Accessory

- 1 x Power code (110~240V)
- 6 x Battery (AA)
